Whilst the utmost care has been taken to accurately display each colour swatch, the final printed result may vary from this digital representation due to screen settings and calibration, different print techniques used &/or colour differences of card-stocks. To ensure your chosen colour selection matches your desired outcome, you may either print these pages on a medium to heavyweight card (we recommend 200gsm or greater) using a high quality printer, or request to purchase a sample pack containing a selection of non-customisable pre-printed designs in your preferred colour theme.
